## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of group I invention, claims 1-10 in the reply filed on October 21, 2003 is acknowledged.

### ***Drawings***

2. Figure 15 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Davison et al., U.S. Patent 5,997,963.

Art Unit: 2823

6. Davison discloses a semiconductor processing apparatus as claimed. See **FIGS. 1-7** where Davison teaches the following limitations.

7. Pertaining to claim 1, Davison teaches a processing apparatus for processing a workpiece, comprising:

a cover **2** for covering a portion of a surface, to be processed, of said workpiece;

a process chamber **1** formed by said cover and said surface, to be processed, of said workpiece; and

a sealing portion **20, 21 & 22** provided between said cover and said surface of said workpiece for sealing said process chamber.

8. Pertaining to claim 2, Davison teaches a processing apparatus according to claim 1, wherein said sealing portion comprises at least one of a contact seal and a non-contact seal (the non-contact seal is located at the grooves).

### ***Objections***

9. Claims 3-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2823
